

Hafizh Sallam

Senior Product Designer — E-Commerce, Airlines, and Banking

Kuala Lumpur, Malaysia hafizhsallam@gmail.com [LinkedIn](#) [Portfolio](#)

SUMMARY

A Senior Product Designer based in Kuala Lumpur, Malaysia with over 10 years of experience working on digital products. I have worked across different industries including e-commerce, travel, and banking, which has helped me understand different types of users and product needs.

Currently at Wego.com, I maintain the design system and work mostly on the end-to-end booking checkout flow. Lately, I have been exploring how to integrate AI into my workflow to improve the design process and streamline day-to-day work.

EXPERIENCE

Wego — Kuala Lumpur, Malaysia · Oct 2021 — Present

Senior Product Designer II · Oct 2024 — Present

- Lead the end-to-end redesign of Wego's flight booking experience across desktop and mobile web, covering fare selection, passenger details, add-ons, payments, and booking details.
- Expand ancillary design with new partnership integrations.
- Improve design workflows and the product delivery process, from discovery and grooming to developer handoff and design QA.
- Maintain and evolve the Wego Design System and drive AI adoption in the design team, from AI-assisted workflows to design-system compliance checks against production code.
- The most senior designer on a flat team reporting to the Product Design Director: guide three senior designers on craft and direction, review their design work to keep quality consistent, and screen candidates during hiring with a say in the final decision.

Senior Product Designer I · Oct 2021 — Sep 2024

- Built the Wego Design System from the ground up: style guide, icon and illustration guidelines, and the full mobile app foundation component library.
- Designed core flight search experiences across web and apps.
- Designed Wego's in-app AI travel assistant: conversation behaviors, voice interaction, and its integration across search and support.
- Supported growth initiatives with a new SEO landing-page system.

SELECTED CASE STUDIES

RHB Banking Group — Kuala Lumpur, Malaysia · Jan 2020 — Oct 2021

UI/UX Designer · Jan 2020 — Oct 2021

- Collaborated in agile cross-functional teams to deliver end-to-end banking web experiences.
- Designed the FPX and other payment gateway flows for banking web and mobile app.
- Designed the cross-border international transfer flow for banking web and mobile app.
- Worked on bank back-office experiences, translating underlying systems and business processes into simple, usable management tools.

AirAsia Berhad — Selangor, Malaysia · Mar 2017 — Dec 2019

UI/UX Designer · Nov 2018 — Dec 2019

- Contributed to the design evolution of AirAsia 3.0, helping transition the website from an airline platform into a super app ecosystem.
- Worked on the end-to-end UX process: research, ideation, prototyping, testing, and iteration.

Web Designer · Mar 2017 — Oct 2018

- Maintained and enhanced website visual design.
- Designed landing pages for campaigns and collaborated closely with marketing teams.
- Worked alongside the CRM team daily, supporting email marketing design and execution.

Lelong.my — Selangor, Malaysia · Nov 2015 — Feb 2017

Web Designer · Nov 2015 — Feb 2017

- Managed website visual design and campaign landing pages.
- Developed design guidelines for major campaigns (MyCyberSale, Black Friday, Chinese New Year).
- Designed newsletters and social media visuals in collaboration with marketing.

Searchfuse Marketing — Freelance Remote (Dubai) · Apr 2015 — Oct 2015

UI Designer & Graphic Designer · Apr 2015 — Oct 2015

Delivered UI and graphic design solutions for various client industries including education and airlines.

Freelance Designer — 2012 — Apr 2015

Graphic & Web Designer · 2012 — Apr 2015

- Worked on multiple graphic and web design projects for clients across different industries.
- Designed and sold digital products on Creative Market and Envato Marketplace, mostly print templates like posters, brochures, icon sets, and graphic assets, building reusable and well-documented assets for a global audience of designers.
